1. N-SHIELD Cover / Hero Screen

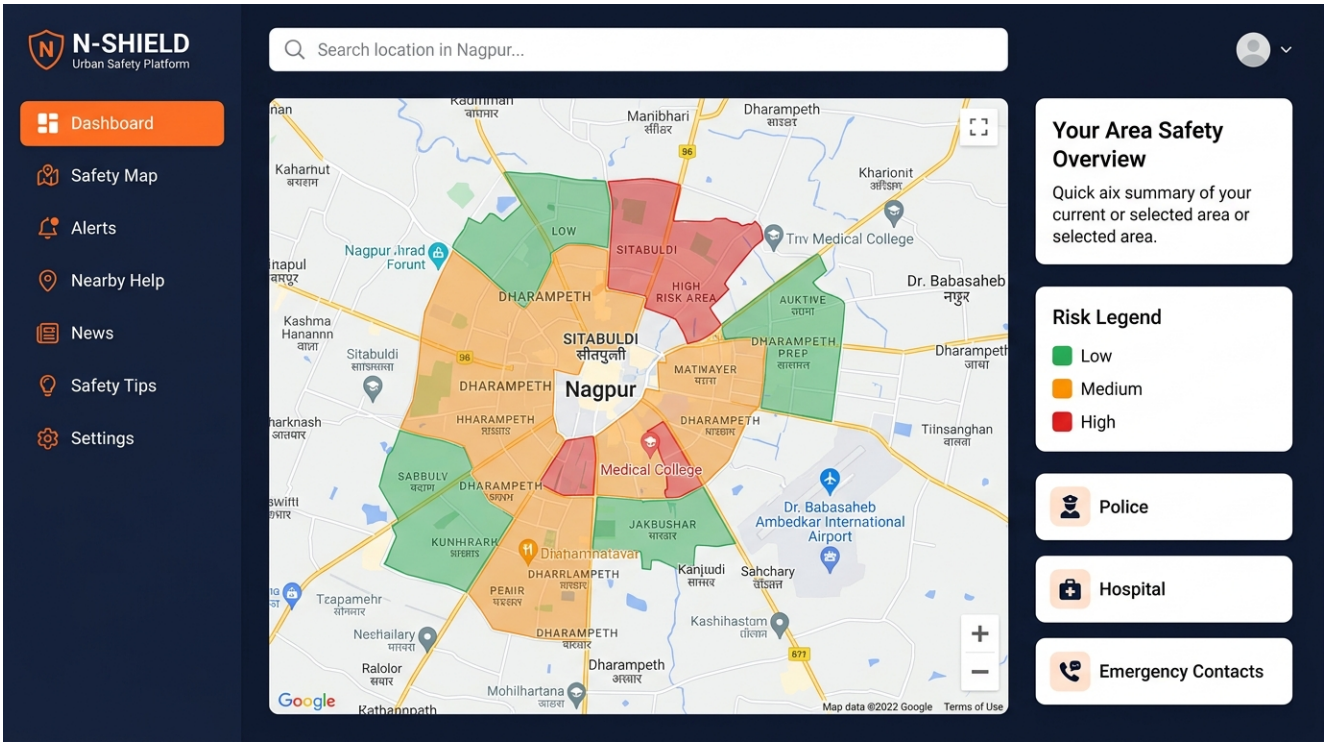

Screen Overview & Technical Purpose:

Hero presentation screen introducing N-SHIELD with an interactive futuristic Nagpur safety map grid, primary branding, and quick action buttons to explore safety maps or initiate emergency support.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

2. Main Citizen Dashboard - Desktop

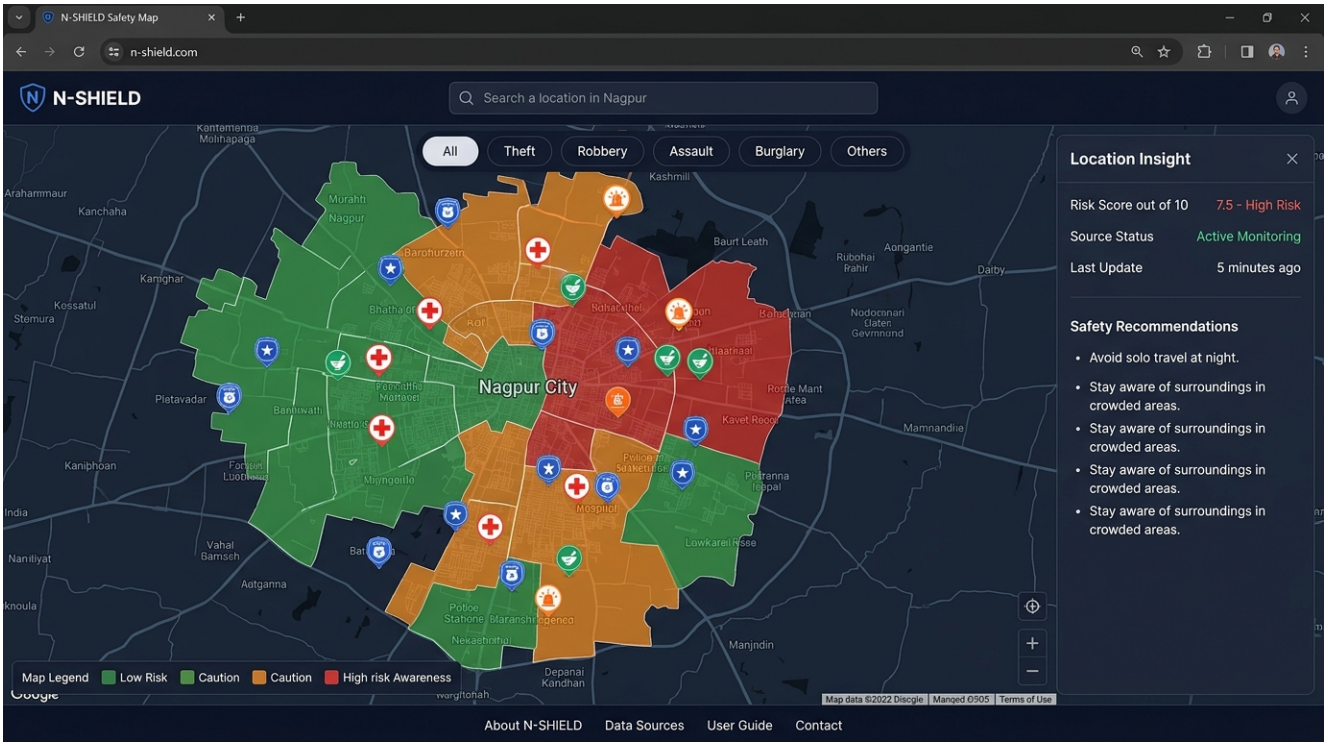

Screen Overview & Technical Purpose:

Comprehensive desktop dashboard featuring sidebar navigation, top location search bar, central Google Maps zone map with Low/Medium/High safety overlays, and quick access cards for local police, hospitals, and emergency contacts.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

3. Interactive Safety Map Screen

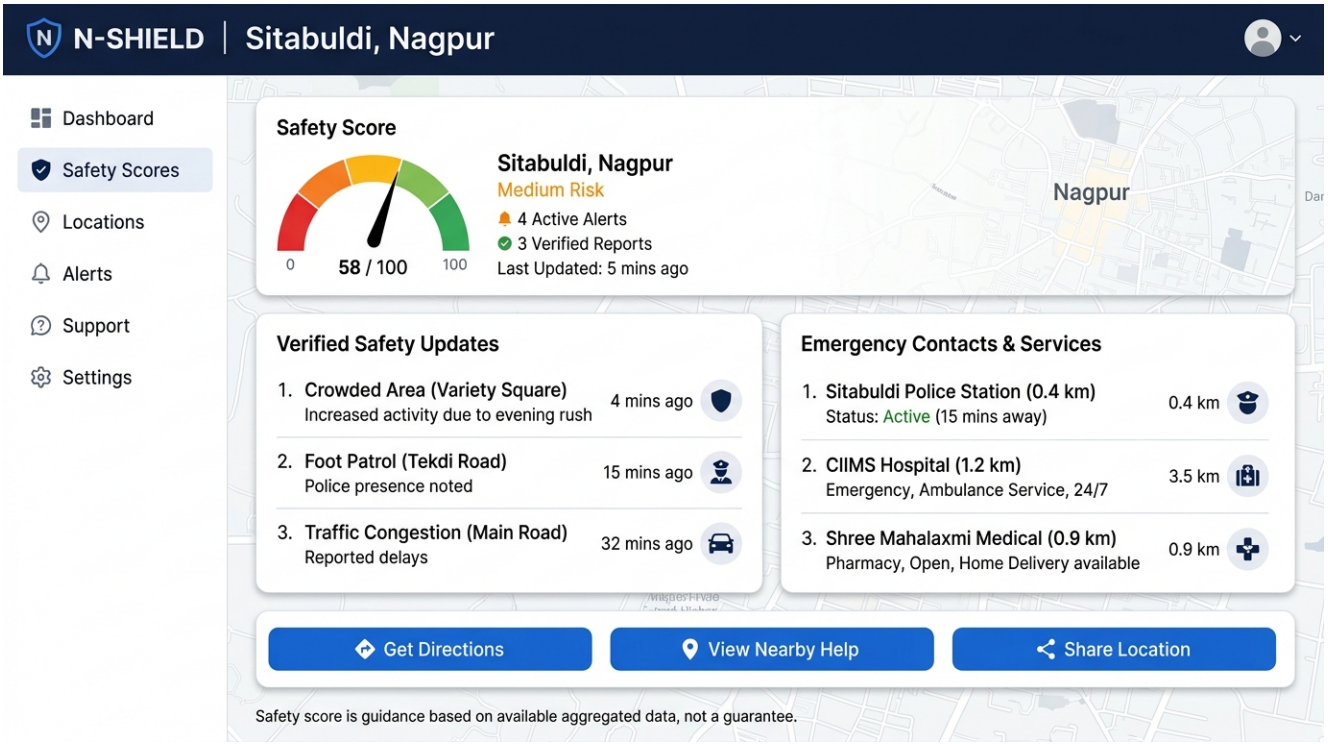

Screen Overview & Technical Purpose:

Detailed interactive map interface of Nagpur featuring color-coded risk zones (Green, Orange, Red), category filter pills, map pin markers for essential services, and a right-hand location insight panel.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

4. Location Details Screen

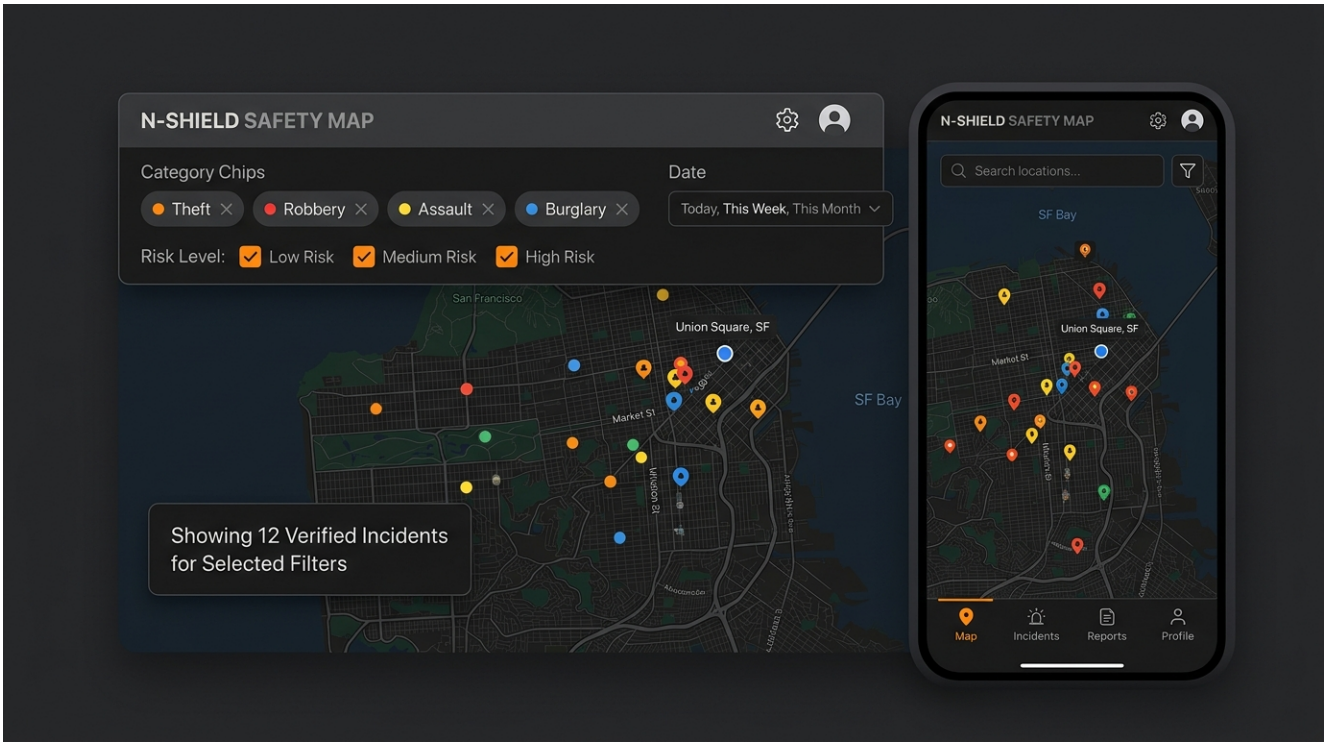

Screen Overview & Technical Purpose:

Focused spatial analysis page for specific Nagpur neighborhoods (e.g., Sitabuldi) displaying a visual safety score meter, verified incident updates, nearby service distances, and quick direction buttons.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

5. Crime Category Filter Screen

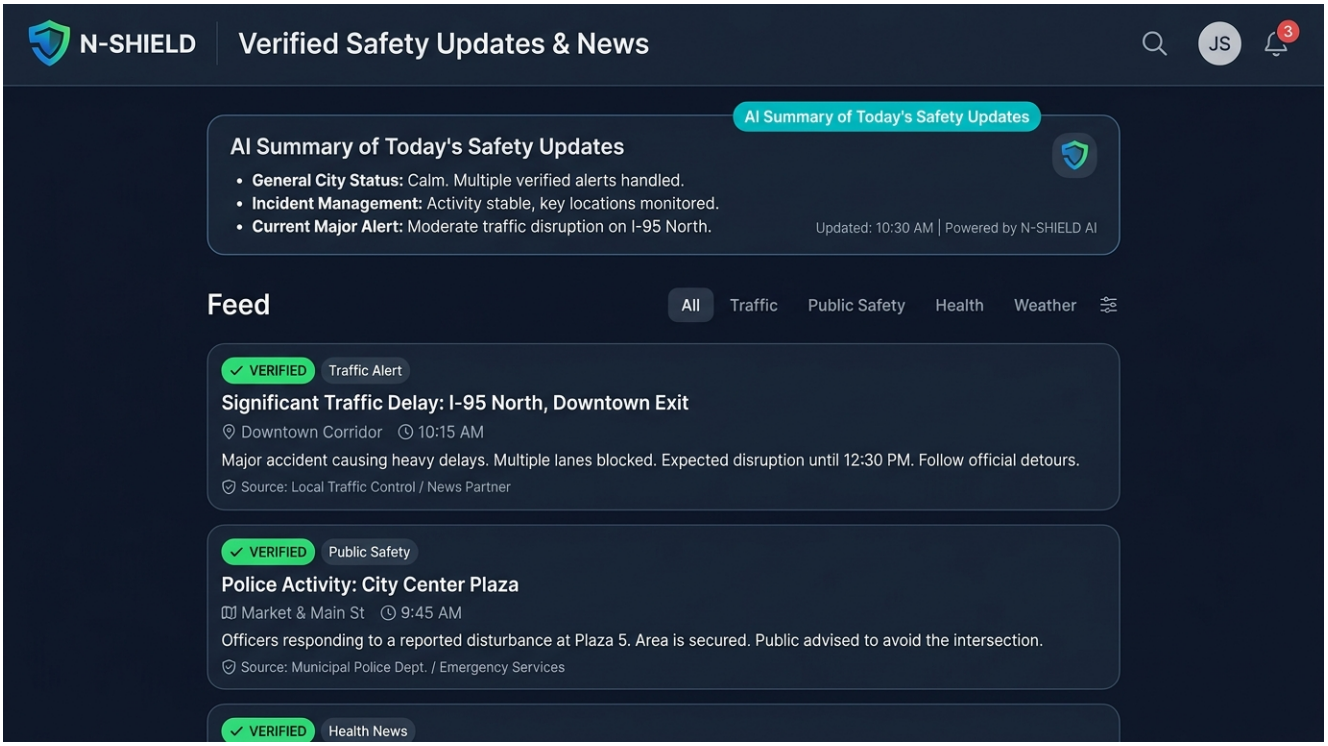

Screen Overview & Technical Purpose:

Dynamic incident filter interface enabling users to filter safety data by category (Theft, Robbery, Assault, Burglary), date ranges, and risk levels, with real-time map marker updates and incident counters.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

6. Verified Safety Updates and News

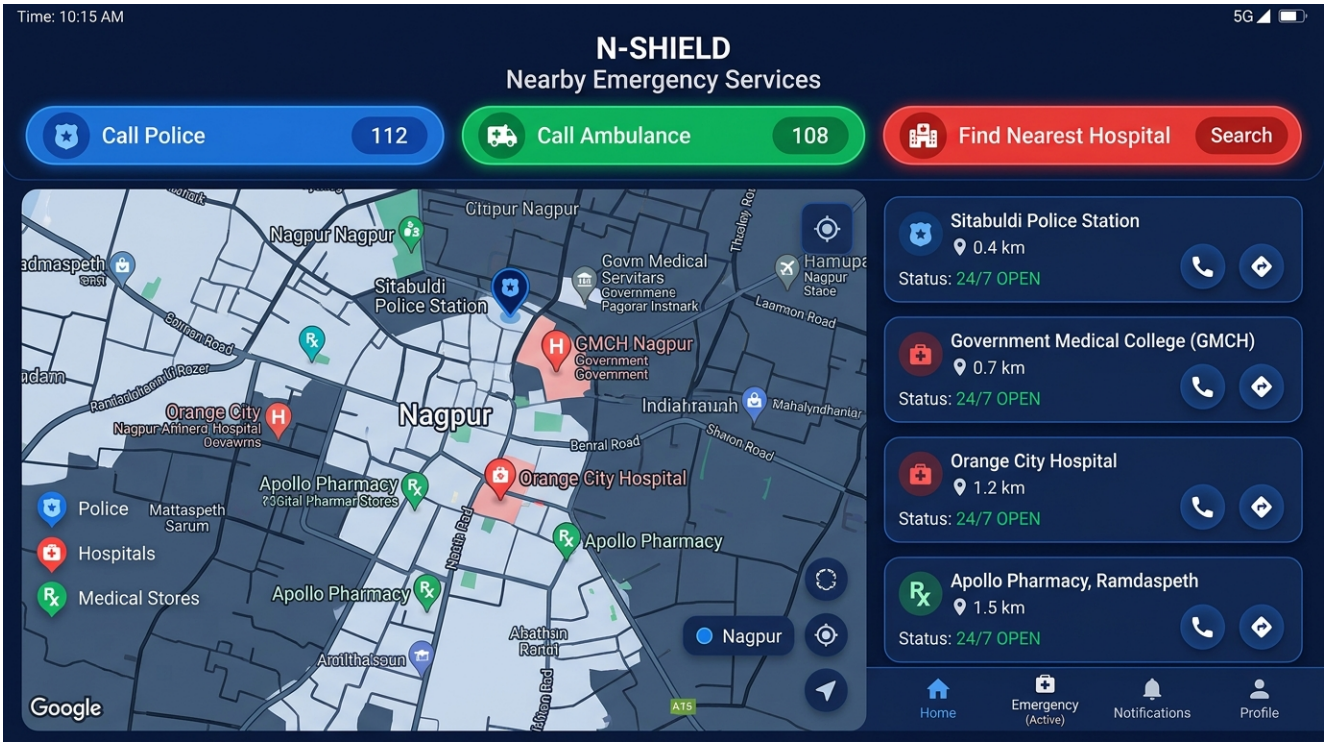

Screen Overview & Technical Purpose:

Trusted news feed displaying AI-summarized daily safety highlights, verified incident cards with official source tags, location metadata, and transparent public safety news references.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

7. Nearby Emergency Services

Screen Overview & Technical Purpose:

High-contrast emergency service interface featuring prominent 1-tap call buttons for Police (112) and Ambulance (108), interactive hospital locator map, and 24/7 service availability listings.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

8. Emergency SOS Mobile Screen

Screen Overview & Technical Purpose:

Mobile-first, calm panic screen providing instant access to emergency hotlines (Police, Ambulance, Fire, Trusted Contacts), live GPS location display, and one-touch location sharing.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

9. Safer Route Comparison

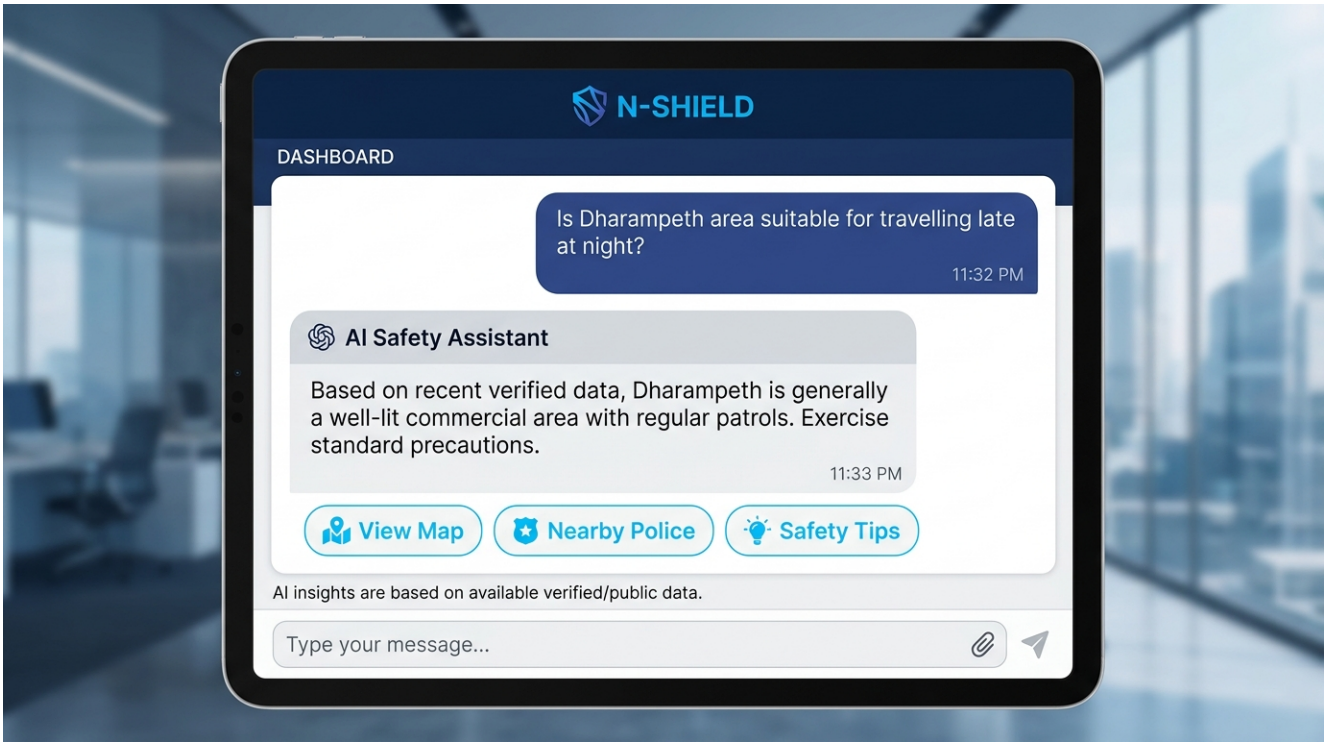

Screen Overview & Technical Purpose:

Predictive travel safety tool comparing multiple routes from Nagpur Station to Dharampeth based on lighting quality, police presence, and aggregated risk index, highlighting the Recommended Safer Route.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

10. AI Safety Assistant

Screen Overview & Technical Purpose:

Conversational AI chat assistant inside N-SHIELD answering citizen queries regarding neighborhood safety, late-night travel advisories, and providing instant links to maps and emergency help.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

11. Safety Tips Screen

Screen Overview & Technical Purpose:

Card-based safety guide providing citizens with practical travel advice, emergency preparation checklists, live location sharing best practices, and well-lit route recommendations.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

12. Authorized Admin Dashboard

Screen Overview & Technical Purpose:

Command center dashboard for municipal authorities and police partners showcasing citywide incident analytics, zone activity trends, verification queues, and broadcast emergency alert management.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

13. Mobile Home Dashboard

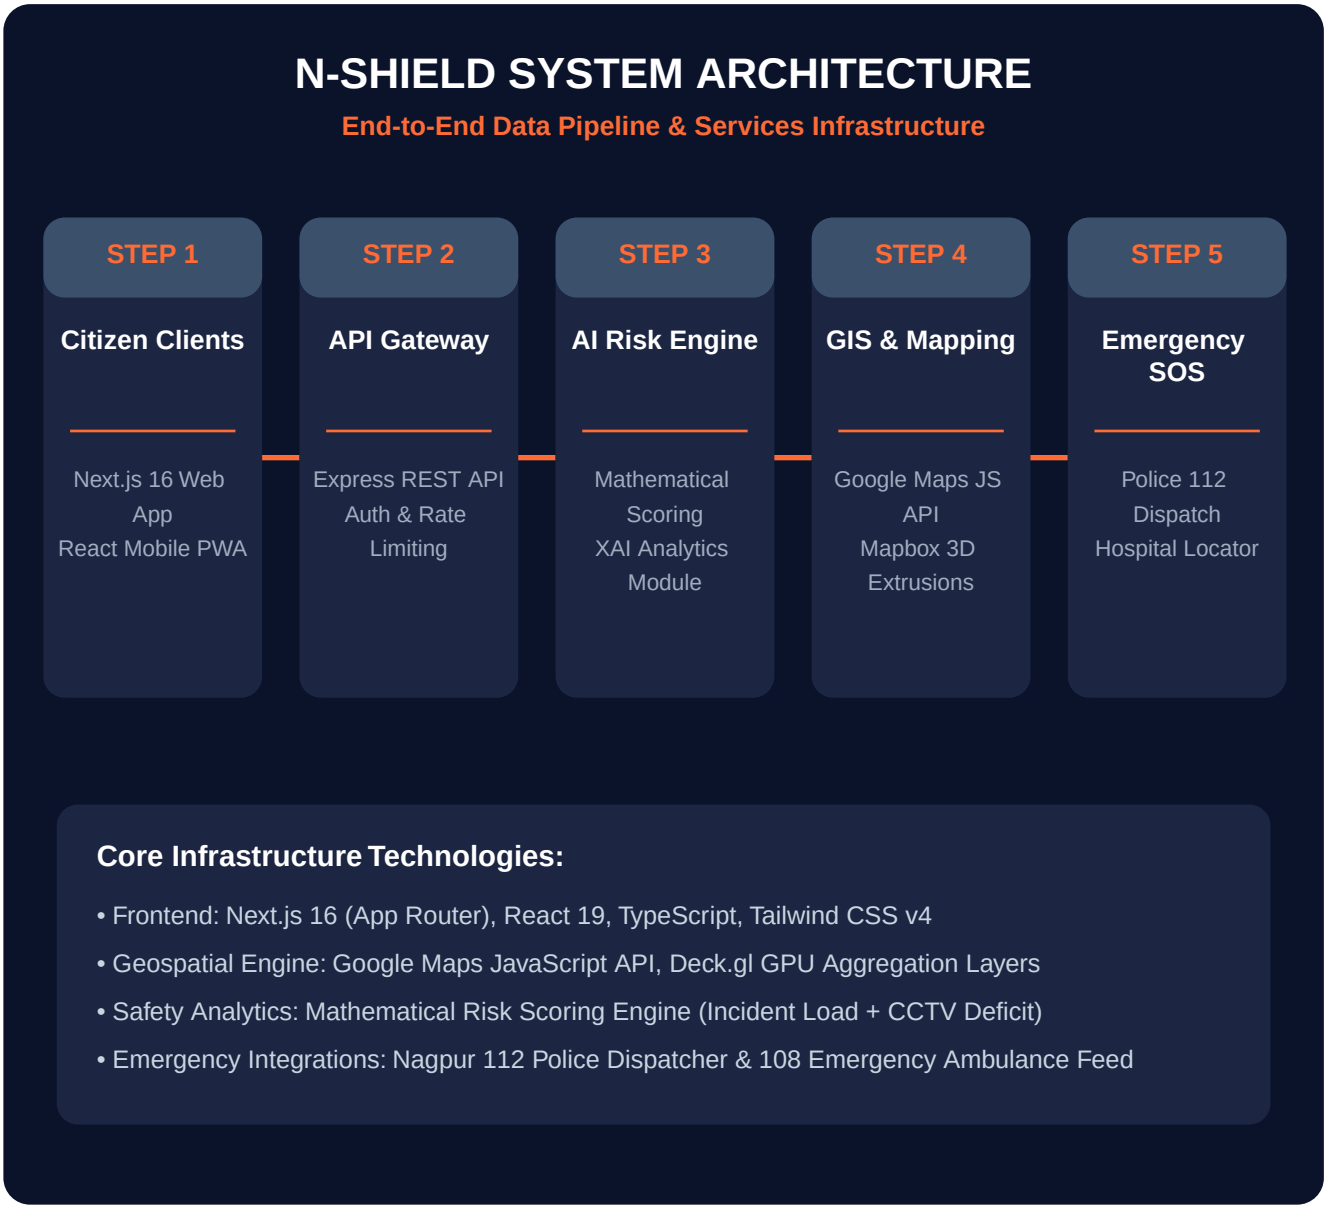

Screen Overview & Technical Purpose:

Compact smartphone home screen featuring a live mini safety map, current area risk badge, quick emergency shortcuts, recent area alerts, and bottom navigation bar.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

14. System Architecture Infographic

Screen Overview & Technical Purpose:

Technical architecture diagram illustrating the end-to-end data flow from Next.js citizen clients through Express REST APIs, AI Risk Engine, GIS Mapbox/Deck.gl layers, to Emergency SOS dispatch systems.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams

15. Complete User Journey Infographic

Screen Overview & Technical Purpose:

Visual step-by-step citizen workflow detailing how users launch N-SHIELD, search locations, evaluate risk scores, view nearby emergency services, select safer routes, and make informed travel decisions.

Platform Scope: Nagpur Smart City Digital Twin | Data Source: Verified Public & Municipal Data Streams
